SUMMARY

Computer Science graduate from Malikussaleh University with academic experience in machine learning development and IT laboratory support. Completed a thesis project on eye disease classification using SVM and Modified Balanced Random Forest algorithms. Holds multiple certifications in information technology. A fast learner with strong analytical thinking and attention to detail, eager to contribute and grow through an internship opportunity.

EDUCATION

Malikussaleh University | Lhokseumawe, Indonesia Bachelor of Computer Science | Jul 2021 - Aug 2026

GPA : 3.77

SKILLS

Programming & Development : Python, HTML, CSS

Machine Learning : Scikit-learn, SVM, Random Forest, Data Preprocessing

System Analysis & Documentation : System Design, Activity Diagram, Flowchart Design, Microsoft Visio / Visual Studio

Design Tools: Figma, Canva

IT Support : PC Hardware Optimization, System Troubleshooting, Windows OS Administration

EXPERIENCE

Informatics Laboratory Technical Assistant Malikussaleh University | 2024 - 2025

- Assisted students in understanding programming concepts, system design, and software utilization during practical laboratory sessions
- Performed routine hardware maintenance and system troubleshooting to ensure optimal laboratory performance
- Collaborated with laboratory management to maintain a productive and well-functioning academic environment
- Supported installation and configuration of software tools used across multiple courses

PROJECTS

Machine Learning Model for Eye Disease Classification, Academic Thesis Project | 2025 - 2026

- Developed a machine learning classification system to categorize eye disease patients using a medical dataset sourced from PIM Hospital
- Implemented and compared two algorithms - Support Vector Machine (SVM) and Modified Balanced Random Forest (MBRF) - to determine the most accurate classification model
- MBRF outperformed SVM with an average accuracy of 85% vs 82.3%, identifying MBRF as the more effective model for this dataset
- Designed complete system documentation including flowcharts and activity diagrams for both user and admin processes
- Built using Python with scikit-learn library for model training and evaluation

CERTIFICATION

No	Certification	Issuer	Year
1	Essential Skills: Digital Literacy	Camy.id	2024
2	Essential Skills: Digital Disruption & Transformation	Camy.id	2024
3	Essential Skills: Emotional Intelligence	Camy.id	2024
4	Essential Skills: Emotional Resilience	Camy.id	2024
5	Essential Skills: Self Efficacy	Camy.id	2024
6	Essential Skills: Social Influence	Camy.id	2024
